Subject: Allow microsoft to advertise to my kids as a punishment?

YOU MUST BE JOKING

The new settlement that "forces" Microsoft to donate software, hardware, and services to America's poorest schools is a JOKE. It's great for the schools but even "BETTER" for Microsoft. Currently in my area the schools have a lot of Apple computers. If these Apple computers where replaced by Microsoft's "Generosity", then the settlement, that was meant to punish Microsoft for monopolizing their industry, would simply further their cause.

Who says "you can win for losing". Sounds like Microsoft certainly will.

Thank you for allowing me the opportunity to voice my opinion,
A Microsoft User
